DETAILED

El ction/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-11 and 27-29, drawn to a printing device including a separate assembly device, classified in class 101, subclass 227.
- II. Claims 12-18 and 30, drawn to a printing method including a cutting operation, classified in class 101, subclass 226.
- III. Claims 19-26, drawn to a printing method including a slitting operation, classified in class 101, subclass 226.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case Group I is an apparatus for a plurality of printed rolls using a folder and Group II is a process for forming the plurality of rolls by cutting them in a horizontal direction.

Inventions I and III are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially

different process. (MPEP § 806.05(e)). In this case Group I is an apparatus for a plurality of printed rolls using a folder and Group III is a process for slitting a web in a vertical direction into a plurality of rolls

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as being able to cut a printed web in a horizontal direction to have at least one printed roll and Group III has a separate utility for slitting a web in a vertical direction into a plurality of rolls. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or Group III, restriction for examination purposes as indicated is proper.

A telephone call was made to William Gehris on June 14, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marvin P. Crenshaw whose telephone

number is (703) 308-0797. The examiner can normally be reached on Monday - Friday 7:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Andrew Hirshfeld can be reached on (703) 305-6619.
